

ID	Name	Heuristic
jav-HE-01	There is no loading or animation transition to the comment section when the user taps the button, which may make it more difficult for consumers to understand what is going on.	H1: Visibility
jav-HE-02	The comment button is easy to find and comprehend, and the design is grounded in reality.	H2: System vs. Real World
jav-HE-03	The comment button is easy to find and comprehend, allowing the user to express themselves freely.	H3: User Control
jav-HE-04	It is simple to understand how to use because the buttons do not change all of the time.	H4: Consistency
jav-HE-05	It's clear where to look for and post comments, and the submit button eliminates any chance of miscommunication.	H5: Error Prevention
jav-HE-06	The back button is a universal symbol that follows the same button orientation as the original Netflix design, minimizing users' cognitive burden when using the program.	H6: Recognition
jav-HE-07	Users may watch their videos or read the comments using a simple design with two buttons to toggle on or off	H7: Flexibility

	the comment section display. This offers the developer the benefit of the doubt since consumers may choose whatever way works best for them.	
jav-HE-08	There's no need to be anxious because the aesthetics are straightforward and well-integrated into the existing interface.	H8: Aesthetic
jav-HE-09	The graphic treatments do not include any error notifications to help users identify and recognize them.	H9: Error Recovery
jav-HE-10	The settings button activates the comment section's interactive elements.	H10: Help and Documentation
