Schedule

- 5:15-5:30 – lab 2 questions/demo time while everybody arrives
- 5:30 – introduce lab 3
- Work time – lab/assignment work, demos, etc.

COEN 163L

Lab 3 – Improve web accessibility

Lab 3 Tasks

1. Based on Lab2 wireframes, create necessary HELP pages (in HTML) to support all kinds of users on the tutoring site.
 - a. There are multiple ways to create **content** for the HELP pages (see next slide)
 - b. You may incorporate hand drawing sketches & upload the images to explain the interaction.
 - i. (you don't need to implement the technology! I.e. your site may offer an intelligent robot as the tutor to practice making conversations with a tutee in learning language).
2. Implement welcome & error messages to improve site accessibility.

Help Content

Should contain information, in multiple mediums, to help support users. Examples include:

- FAQ (text)
- Step-by-step screenshot based tutorials (visual/text)
- Video tutorials (visual/auditory)
- Contact information for support
- More!

Welcome & Error Messages

- How can your website let users know what's happening?
- Does your website allow users to fix any errors?
- More!
